PIAGGIO Ape Parasol Ice-cream

The Piaggio Ape has its origins in Italy, and is particularly suitable for conversion into a specialized catering vehicle. The PARASOL ICE-CREAM is constructed using the Ape 50 Pick Up Top as a basis. This is a single-seater vehicle which can be driven by anybody with a moped or car licence. Your new Ape PARASOL ICE-CREAM is specially made to your specifications.

The lightweight aluminium and steel retail unit is equipped with a stainless steel worktop. The aluminium and steel parts of the Ape PARASOL ICE-CREAM are finished in a hard powder coating, available in any RAL colour according to the client's preference.

A stainless steel container is welded into the worktop, and supplied with a large insulated cover into which ice-cream containers can be placed. The cover can be adapted to accept either round or rectangular containers. There is serving space for 2 x 5 standard stainless steel ice-cream containers (16.2x36.5cm).

Various optional extras are available:

- Water container with tank and pump
- Electricity supply with fusebox
- Overhead lighting

See the price list for a full description of all the options.

The dimensions of the stainless steel worktop are as follows: L 135cm x W 127cm x H 43 cm. Underneath the worktop you are provided with extra storage space for cones and beakers.

Gross prices, excluding VAT or Export. Changes and printing errors reserved. Current prices can always be obtained from Vakgarage van Marrewijk.
